## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-5,7,10,13-34 are allowed over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

As per independent claims 1,21, and 23, the recited limitations pertaining to specifying a prosody parameter with two attributes that encompass a target, a value, and a time for reaching the target value, is not explicitly taught by the prior art of record. With respect to the prior art of record, Yang et al teaches the specification of a phoneme, and associated with each phoneme there is a specification of either a phoneme, or a pause. Both have a duration specification and phonemes have additionally, a pitch contour specification and an energy specification. Thus, illustratively, (focusing on phonemes) the Yang et al embodiment may have the string "e,80,p-contour,E-contour 17; o, 150, P-contour 9,E-oontour 4", however, the recited steps of claim 1 would generate a string as such: "e,80;o,150, P117@91,P112@141", wherein the numbers 91 and 141 market the target value, and both are less than the duration value of 120. Campbell et al (6366883) teaches the notion of a target phoneme, but do not teach the notion of a parameter value target; i.e., Campbell et al does not teach setting a parameter value target AND a point in time when the target is to be reached. Furthermore, it would not have been obvious to one of ordinary skill in the art of speech synthesis at the time the invention was made to modify the

teachings of the prior art of record to obtain the recited claim limitations of the independent claims as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
